Better **Education**
for A **Better World**

Explore Your **Learning opportunity** with us

About us

We began from the need to develop skilled pool of technology talent for the community: Our workforce development programmes are modular, stackable learning pathways. These range from short soft-skills workshops to workplace literacy and digital skills courses. Meanwhile our professional diplomas, degrees and executive education programmes operate in partnership with internationally-renowned universities. We strive to be a model organisation, honouring God in our corporate lifestyle, achieving a creditable reputation in the marketplace based on Biblical principles.

Our Mission

To fetch meaning and passion into every student's life through quality teaching.

In order to offer the best skilling/training & services, we have entered into professional association with some of the best organizations in and out of the country and have worked hard to develop an unmatched track record. We constantly improve ourselves and find unique ways to deliver our services.

Java | Machine Learning | Mobile Development | Python
Software Design | Software Testing | Web Development

Networking Solutions

Cisco Develops, manufactures and sells networking hardware, software, telecommunications equipment and other high-technology services and products. Through its numerous acquired subsidiaries, such as OpenDNS, Webex, Jabber and Jasper, Cisco specializes in specific tech markets, such as the Internet of Things (IoT), domain security and energy management.

CCNA Enterprise Edition : CCNP | CCIE

Microsoft COURSES validate the knowledge, abilities, and skills IT professionals acquire on-the-job and prepare IT professionals to use new technologies. Because IT certifications demonstrate proficiency, certified IT professionals are highly sought-after by companies. MCSE is expert-level and validates your ability to work with Microsoft technologies.

Red Hat, Inc. is an American IBM subsidiary software company that provides open source software products to enterprises. The Red Hat certification program aims at system administrators, engineers, architects, enterprise developers, and application administrators, as well as cloud and virtualization administrators, who use RHEL in their IT infrastructures. The certification program aims to ensure that candidates are proficient in RHEL.

Networking Solutions

Cloud computing is a secure cloud service platform , offering compute power, database storage , content delivery and other functionality to help business scale and grow. Cloud computing is a popular option for people and businesses for a number of reasons including cost savings, increased productivity, speed and efficiency, performance, and security. Cloud computing can be both public and private.

Ethical Hacking

With the growth of the Internet, computer security has become a major concern for businesses and governments. They want to be able to take advantage of the Internet for electronic commerce, advertising, information distribution and access, and other pursuits, but they are worried about the possibility of being “hacked.” At the same time, the potential customers of these services are worried about maintaining control of personal information also.- Successful ethical hackers possess a variety of skills.

Architectural Softwares

Architecture software has become essential in the modern digital world, making it easier to draw up, save, and print plans for your designs. Additionally, while there are various digital design packages out there, architects need something more dedicated than normal graphic design software. Due to technological advancement, the amount of software serving Civil Engineering and design needs is increasing tremendously. Here is a list of civil engineering software that is exorbitantly used by many civil engineers all around the world. Also, find below the best civil engineering software courses to be learned by every civil engineer. AUTO CAD 2D & 3D, Sketch Up, 3ds Max, Revit.

Accounting Softwares

Accounting software is a solution used by bookkeepers, accounting professionals, and business owners to process accounting transactions and manages accounts. Here are some of the most important features, benefits, and things to consider when you pick an accounting tool for your business. TallyPrime, you can discover and look at reports, slicing and dicing them the way you want. To help you in your growth journey, TallyPrime enables you to manage multiple companies and incrementally add features such as multiple go downs, multi-currency, order process, cost centres etc. This helps you get rid of complexities, and in turn, focus on business growth.

The abbreviation of MEAN stands for MongoDB, Express, Angular, and Node, respectively. This technology stack is open source and commonly used for web and hybrid mobile app development. MEAN is a complete JavaScript-based stack that combines clients, databases, and servers.

- JavaScript based
- Open-source
- Large and extensive knowledge base
- Isomorphic code that runs in client and server end
- Excellent user interface and user experience capabilities
- Easy transfer and reusability of code
- Flexible for use with big data
- Object-oriented programming
- Cloud support
- Large user base
- Seamless data transfer

MERN is short for MongoDB, Express, React, and Node, after the four key technologies that make up the stack. Like MEAN, MERN offers a collection of JavaScript-based databases, frameworks, and runtime environments. The MERN stack offers an end-to-end framework for developers, and its popularity is growing rapidly.

- JavaScript based
- Open-source
- Strong community support
- Isomorphic code that runs in client and server end
- Easy learning curve
- Code maintenance and bug fixes
- Powerful testing tools
- Growing popularity among developers
- Robust for native applications
- Good documentation

Digital Marketing

Digital marketing is a form of marketing that encompasses the use of digital tools or channels to communicate to your audience. It's become one of the most preferred forms of marketing to reach millions of targeted groups within small time frame and bringing together customization and mass distribution to accomplish marketing business goals. Job opportunities in digital marketing are constantly increasing and more and more people are getting employed.

Anyone who is interested in explaining the scope of digital marketing should have an idea about the present and future scope of it. By reading a blog that has thoroughly explained the process and effectiveness of Digital Marketing would be helpful. In the present world scenario, we know everyone has access to the internet through their smartphones that are available at cheaper rates now. According to the global statistics, more than 85% of youngsters, 70% of middle ages and 48% of elderly people are users. This ratio is increasing exponentially over years. To learn digital marketing in now days is a good career option.

Logistics & Supply Chain Management

Logistics typically refers to activities that occur within the boundaries of a single organization and Supply Chain refers to networks of companies that work together and coordinate their actions to deliver a product to market. Also, traditional logistics focuses its attention on activities such as procurement, distribution, maintenance, and inventory management. Supply Chain Management (SCM) acknowledges all of traditional logistics and also includes activities such as marketing, new product development, finance, and customer service.

- Management of inventory processes.
- Customer requirements forecasting of demand managing logistics & shipping return management

Diploma : 6 Months

PG Diploma : 12 Months

Hospital Administration

Today a modern hospital has just not only the doctor and nurses alone but a large contingent of administrative support staff. In any large corporate hospital, the medical staff comprising of doctor and nurse v/s the support staff runs into a ratio of 60 : 40. That means almost 40% of the staff in any modern corporate hospital would be support staff comprising of admin, HR, Patient Relation, Accounts, Record maintenance etc. The success of a large modern hospital today to a very large extent depends upon the quality and effectiveness of its non-clinical support staff who works as interface between doctor and patient, patient and nurse and between doctor and nurse with in the hospital. These positions in a modern hospital generally falls in following categories : Administrator, Admin Executive, OP Secretary, PRO, Front office executive.

The mission of hospital is to provide quality healthcare with compassion efficiency. To promote an environment in hospital that facilitates protection of patients rights and commitment towards patient care.

Undoubtedly interpersonal skills play a very important role in making this career a success. Along with this set of soft skills, people with a certified educational qualification in hospital administration have the upper hand in getting recruited in to this position, in large multi-speciality hospitals in and around our country.

Medical Coding

Medical coding play an important role in healthcare industry . Medical coding is the transformation of healthcare diagnosis, procedure, medical services and equipment into universal medical alphanumeric codes for the purpose of medical billing . Based on the codes , medical billers submit claims to the payers (insurance providers or government programs) to receive reimbursement for the services rendered to the patients.

Medical Scribing

Medical scribing is the latest revolutionary concept raised in modern medicine. Traditionally Doctor has to do only patient care. But the advent of EHR (Electronic Health Record) created more documentation and clerical work. So, to relieve documentation and clerical operation by doctors, there is an option that arrived, that is, medical scribing. As the Doctor examines the patient, a third person named the medical scribe watches the examination through video call or Google lens or any other gadget and transcribes everything they see. It will save doctors to me for patient care. In this advanced process, Google technology enables a second person to experience what the Doctor observes and hears in another country and become the Doctor's real-time assistant. Scribes are part of the medical care team. You work directly with the Doctor on a fixed schedule Scribes are part of the Doctor's care team. They are in constant contact with the Doctor and can observe and hear everything the doctor experiences for a day. Scribes are essential in capturing the narrative of every patient visit
